RE: "No Effect" Blanket Approval between Dominion Transmission, Inc. and WV DCH

Dear Mr. Reid-Smith:

Enclosed is the executed copy of the "No Effect" Blanket Approval Agreement between Dominion Transmission, Inc., Dominion Hope, and the West Virginia Division of Culture and History (WV DCH). The Agreement will be in effect until March 15, 2018. The Agreement provides blanket approval under Section 106 of the National Historic Preservation Act, and its implementing regulations for minor projects involving maintenance and construction on an existing natural gas pipeline system.

If you have any questions, please do not hesitate to contact Richard Gangle at 304-627-3225 or by email at Richard.B.Gangle@dom.com.

Sincerely,

A handwritten signature in cursive script that reads "Lisa C. Moerner".

**RE: Dominion Transmission, Inc.
2014 TL-283 Pipeline Replacement Project - Area 2
Flood Plain Development Permit Application
McClellan District, Doddridge County, West Virginia**

Dear Mr. Sandora:

Dominion Transmission, Inc. (DTI) has enclosed for your review the Doddridge County Flood Plain Permit Application for the 2014 TL-283 Pipeline Replacement Project - Area 2 (Project) in McClellan District, Doddridge County, West Virginia, with applicable \$500.00 fee made payable to the Doddridge County Commission (Enclosure 1). Pipeyard 1, associated with the Project, is located within the Robinson Fork 100-year flood plain at the intersection of WV-23 and Roundbottom Road in Center Point, WV (Enclosure 2: Figures 1, 2, and 3). Pipeyard 1 is 2.67 acres in total size.

DTI is proposing to perform the following activities with the FEMA-mapped 100-year floodplain:

1. Gravel approximately 2.12 acres within the flood plain of Robinson Fork. DTI will not alter the current elevation of Pipeyard 1.
2. Install timber mat equipment crossings over Stream S2-4 and Wetland W2-3 (1.3 acres). Typical construction drawings have been included for your review (Enclosure 3).

The wetland and stream within the flood plain will be restored to original grades, contours, and vegetation types at the completion of construction activities. The graveled portion of the pipeyard will remain graveled. No above-ground features are associated with the proposed Project; therefore, Section 6 – As Built Elevations is not applicable to the Project.

If you have any questions concerning the application or need additional information, please contact William Scarpinato at (804) 273-3019 or William.A.Scarpinato@dom.com. Please direct your response to:

E. CONFIRMATION FORM

THE APPLICANT ACKNOWLEDGES, AGREES, AND CONFIRMS THAT HE/IT WILL PAY WITHIN 30 DAYS OF RECEIPT OF INVOICE BY THE COUNTY FOR ALL EXPENSES RELATIVE TO THE PERMIT APPLICATION PROCESS GREATER THAN THE REQUIRED DEPOSIT FOR EXPENSES INCLUDING:

- (A) PERSONAL SERVICE OF PROCESS BY THE DODDRIDGE COUNTY SHERIFF AT THE RATES PERMITTED BY LAW FOR SUCH SERVICE.
- (B) SERVICE BY CERTIFIED MAIL RETURN RECEIPT REQUESTED.
- (C) PUBLICATION.
- (D) COURT REPORTING SERVICES AT ANY HEARINGS REQUESTED BY THE APPLICANT.
- (E) CONSULTANTS AND/OR HEARING EXPERTS UTILIZED BY DODDRIDGE COUNTY FLOODPLAIN ADMINISTRATOR/MANAGER OR FLOODPLAIN APPEALS BOARD FOR REVIEW OF MATERIALS AND/OR TESTIMONY REGARDING THE EFFICACY OF GRANTING OR DENYING THE APPLICANT'S FLOODPLAIN PERMIT.

NAME (PRINT): Brian C. Sheppard

SIGNATURE: 

DATE: April 16, 2014

After completing SECTION 2, APPLICANT should submit form and fees to Clerk of Doddridge County Court or his/her representative for review.

SECTION 3: FLOODPLAIN DETERMINATION (to be completed by Floodplain Administrator/Manager or his/her representative)

THE PROPOSED DEVELOPMENT:

THE PROPOSED DEVELOPMENT IS LOCATED ON:

FIRM Panel: _____

Dated: _____

- Is NOT located in a Specific Flood Hazard Area (Notify applicant that the application review is complete and NO FLOODPLAIN DEVELOPMENT PERMIT IS REQUIRED).
- Is located in Special Flood Hazard Area.
FIRM zone designation _____
100-Year flood elevation is _____ NGVD .
Stream name _____
Profile # _____
- Unavailable
- The proposed development is located in a floodway.
- See section 4 for additional instructions.

SIGNED _____

DATE _____

SECTION 4: ADDITIONAL INFORMATION REQUIRED FOR DEVELOPMENT IN SPECIAL FLOOD HAZARD AREA (To be completed by Floodplain Administrator/Manager or his/her representative)

The applicant must submit the documents checked below before the application can be processed.

- A plan showing the location of all existing structures, water bodies, adjacent roads and proposed development.
- Development plans, drawn to scale, and specifications, including where applicable: details for anchoring structures, storage tanks, proposed elevation of lowest floor, (including basement or crawl space), types of water resistant materials used below the first floor, details of flood proofing of utilities located below the first floor and details of enclosures below the first floor.
Also _____

- Subdivision or other development plans (If the subdivision or development exceeds 10 lots or 2 acres, whichever is the lesser, the applicant must provide 100-year flood elevations if they are not otherwise available).
- Plans showing the extent of watercourse relocation and/or landform alterations.

- Top of new fill elevation _____ Ft. NGVD.
For floodproofing structures applicant must attach certification from registered engineer or architect.
- Certification from a registered engineer that the proposed activity in a regulatory floodway will not result in any increase in the height of the 100-year flood. A copy of all data and calculations supporting this finding must also be submitted.
- Manufactured homes located in a Flood Hazard Area must have a West Virginia Contractor's License and a Manufactured Home Installation License as required by the Federal Emergency Management Agency (FEMA).
- Other: _____

SECTION 5: PERMIT DETERMINATION (To be completed by Floodplain Administrator/Manager or his/her representative)

I have determined that the proposed activity (type is or is not) in conformance with provisions of the Floodplain Ordinance adopted by the County Commission of Doddridge County on May 21, 2013. The permit is issued subject to the conditions attached to and made part of this permit.

SIGNED _____ DATE _____

If the Floodplain Administrator/Manager found that the above was not in conformance with the provisions of the Doddridge County Floodplain Ordinance and/or denied that application, the applicant may appeal.

APPEALS: Appealed to the County Commission of Doddridge County? Yes No
 Hearing Date: _____
 County Commission Decision - Approved Yes No

CONDITIONS: _____

SECTION 6: AS-BUILT ELEVATIONS (To be submitted by APPLICANT before Certificate of Compliance is issued). **NOT APPLICABLE**

The following information must be provided for project structures. This section must be completed by a registered professional engineer or a licensed land surveyor (or attach a certification to this application).

COMPLETE 1 OR 2 BELOW:

- 1 Actual (As-Built) Elevation of the top of the lowest floor (including basement or crawl space is _____ FT. NGVD.
 - 2 Actual (As Built) elevation of floodproofing is _____ FT. NGVD.
- Note: Any work performed prior to submittal of the above information is at risk of the applicant.

SECTION 7: COMPLIANCE ACTION (To be completed by the Floodplain Administrator/Manager or his/her representative).

The Floodplain Administrator/Manager or his/her representative will complete this section as applicable based on inspection of the project to ensure compliance with the Doddridge County Floodplain Ordinance.

INSPECTIONS:

DATE: _____ BY: _____
DEFICIENCIES? Y/N

COMMENTS _____

SECTION 8: CERTIFICATE OF COMPLIANCE (To be completed by Floodplain Administrator/Manager or his/her representative).

Certificate of Compliance issued: DATE: _____ BY: _____

**CERTIFICATE OF COMPLIANCE
FOR DEVELOPMENT IN SPECIAL FLOOD HAZARD AREA (OWNER MUST RETAIN)**

PERMIT NUMBER: _____
PERMIT DATE: _____

PURPOSE –

CONSTRUCTION LOCATION: _____

OWNER'S ADDRESS: _____

THE FOLLOWING MUST BE COMPLETED BY THE FLOODPLAIN ADMINISTRATOR/MANAGER OR HIS/HER AGENT.

COMPLIANCE IS HEREBY CERTIFIED WITH THE REQUIREMENT OF THE FLOODPLAIN ORDINANCE ADOPTED BY THE COUNTY COMMISSION OF DODDRIDGE COUNTY ON MAY 21, 2013.

SIGNED _____ DATE _____

3.27 - SILT FENCE

Introduction

A temporary sediment barrier consisting of a synthetic filter fabric stretched across and attached to supporting posts and entrenched. Used to intercept and detain small amounts of sediment from disturbed areas during construction operations in order to prevent sediment from leaving the site.

No sediment control device is misused more than silt fence (with the possible exception of hay bales). Much of the silt fence used in West Virginia is not installed properly. The device does not work if:

1. not entrenched a minimum of 4 inches.
2. not placed on the contour-perpendicular to the flow of the water.
3. installed in areas of concentrated flows.
4. installed to contain sediment from too large of an area.
5. little or no maintenance is performed on it.

Silt fence does not actually filter sediment from muddy water. In field conditions silt fence acts as a barrier to the flow of water, like a dam, reducing the energy of the water, which causes the suspended material to settle out. It is because of the low permeability of the fabric that silt fence is limited to small drainage areas

Installing silt fence is very labor intensive. It is usually installed by hand and accumulated sediment must be removed and disposed of by hand. In many scenarios, installing a diversion and sediment trap would be more effective and less expensive than using silt fence. In addition, the NPDES permit requires that a sediment trap or basin be installed whenever possible.

Conditions Where Practice Applies

1. Below disturbed areas where erosion would occur in the form of sheet and small rill erosion.
2. Where the size of the drainage area is no more than one-quarter acre per 100 feet of silt fence length; the maximum gradient above the barrier should be less than 2:1.
3. Silt fence will not be used in areas where rock or some other hard surface prevents the full and uniform anchoring of the barrier.
4. Silt fence should NEVER be installed in streams or swales or in any area where there is a reasonable chance of concentrated flow. In areas where concentrated flows can be expected, use diversions and sediment traps and /or sediment basins. In ditches or swales rock check dams should be used in place of silt fence.

Design Criteria

1. No formal design is required. An effort should be made to locate silt fence at least 5 feet to 10 feet beyond the toe of slope.

2. Silt fence should be limited to situations in which only sheet is expected.
3. Silt fence should be installed prior to major soil disturbance.
4. Silt fence should be placed across the bottom of a slope along a line of uniform elevation (ALWAYS perpendicular to the direction of flow).
5. Any time a section of silt fence is knocked down by concentrated flows the silt fence will be replaced with a diversion and sediment trap or super silt fence.

Construction Specifications

Materials

1. Synthetic filter fabric shall be a pervious sheet of propylene, nylon, polyester or ethylene yarn and shall be certified by the manufacturer or supplier as conforming to the requirements noted in WV DOT DOH Specifications or the GEOTEXTILE section.
2. Synthetic filter fabric shall contain ultraviolet ray inhibitors and stabilizers to provide a minimum of 6 months expected usable construction life at a temperature range of 0 to 120 degrees Fahrenheit.
3. If wooden stakes are utilized for silt fence construction, they must be a minimum of 2" x 2" when oak is used and 2" x 4" when pine is used. Wooden stakes should have a minimum length of 5 feet.
4. If steel posts (standard "U" or "T" section) are utilized for silt fence construction, they must have a minimum weight of 1.33 pounds per linear foot and should have a minimum length of 5 feet.

Installation

1. The height of a silt fence shall be a minimum of 16 inches above the original ground surface and shall not exceed 34 inches above ground elevation.
2. The filter fabric shall be purchased in a continuous roll cut to the length of the barrier to avoid the use of joints. When joints are unavoidable, the silt fence shall be spliced together only at a support post, by twisting the last post of each run around the other, and securely sealed. (see drawing)
3. A trench shall be excavated approximately 4 inches wide and 4 inches deep on the upslope side of the proposed location of the measure.
4. The filter fabric shall be fastened securely to the upslope side of the posts using one inch long (minimum) heavy-duty wire staples or tie wires and eight inches of the fabric shall be extended into the trench. The fabric shall not be stapled to existing trees. The most common type of silt fence has the stakes attached to the fabric at the factory.
5. The 4-inch by 4-inch trench shall be backfilled and the soil compacted over the filter fabric.

Maintenance

6. Silt fence shall be removed when it has served its useful purpose, but not before the upslope area has been permanently stabilized.
 7. Turn the end of a run of Silt Fence slightly uphill to prevent runoff from going around the end.
1. Silt fences shall be inspected immediately after each rainfall of 0.5 inch or greater and at least daily during prolonged rainfall or once a week. Any required repairs or maintenance shall be made immediately.
 2. Close attention shall be paid to the repair of damaged silt fence resulting from end runs and undercutting. If the fence is not installed on the contour (perpendicular to the flow of the water) both of these conditions can occur.
 3. Should the fabric on a silt fence decompose or become ineffective prior to the end of the expected usable life and the barrier still is necessary, the fabric shall be replaced promptly.
 4. Sediment deposits should be removed after each storm event. They must be removed when deposits reach approximately one-half the height of the barrier.
 5. If any section of silt fence is knocked down during a rain event (because it was installed in an area of concentrated flow) then other measures such as a sediment trap and diversion or super silt fence must be installed.

RE: 2013 TL-283 Pipeline Replacement Project
FR# 13-642-Multi

Dear Mr. Bisha:

We have reviewed the above mentioned project to determine its effects to cultural resources. As required by Section 106 of the National Historic Preservation Act of 1966, as amended, and its implementing regulations, 36 CFR 800: "Protection of Historic Properties," we submit our comments.

According to the information submitted, Dominion Transmission is proposing the replacement of three segments of TL-283 in Tyler and Doddridge Counties, WV. The vast majority of the proposed project is covered by our Blanket Agreement; however, the proposed access roads, one horizontal directional drill workspace and one proposed temporary work space/turn-around fall outside the existing disturbed right-of-way and were surveyed as part of this project.

Archaeological Resources:

According to the report, survey of the proposed project area resulted in the identification of two new archaeological resources, 46DO55 and 46DO56. Both sites consist of low density scatters of historic era artifacts that are likely associated with extant homesteads located outside of the Area of Potential Effect (APE). In addition, the sites lack integrity as well as evidence suggesting the presence of subsurface features and stratified deposits. As a result, we concur that the portions of the sites within the proposed project boundaries are not likely to produce significant information. Because both sites likely extend well beyond the proposed project area, the site boundaries could not be determined. Nor could they be assessed for their National Register eligibility. As a result, we concur that the project will have no adverse effect on sites 46DO55 and 46DO56.

Architectural Resources:

Submitted information indicates that there are two properties located within the defined APE for this project. It is the consultant's opinion that neither property is eligible for inclusion in the

June 13, 2013
Mr. Bisha
FR#: 13-642-MU
Page 2

National Register of Historic Places. After review of the submitted information, including completed Historic Property Inventory (HPI) forms, we concur with this assessment. It is the consultant's opinion that there are no architectural resources eligible for or included in the National Register of Historic Places that will be impacted by this project. We concur with this assessment. No further consultation regarding architectural resources is necessary.

Cemetery Resources:

Thank you for documenting the Swiger Cemetery (46DO57). It is our understanding that the cemetery falls outside of the proposed project's Area of Potential Effect. As a result, it was not assessed for its National Register eligibility. We have no objection to the placement of a sign notifying construction workers to keep construction equipment away from the cemetery. The completed cemetery survey form will be added to our records for future use.

We appreciate the opportunity to be of service. *If you have questions regarding our comments or the Section 106 Process, please contact Lora A. Lamarre-DeMott, Senior Archaeologist, or Shirley Stewart Burns, Structural Historian, at (304) 558-0240.*

Sincerely,

Susan M. Pierce
Deputy State Historic Preservation Officer

Division of Natural Resources
RIGHT OF ENTRY

Re: **LS-14-VI/09-572**

Dominion Transmission, Inc.
5000 Dominion Blvd.
Glen Allen, VA 23060-

Dear Sir or Madam:

The Division of Natural Resources hereby grants to you for a period of ten (10) years from the date hereof, a Right of Entry to install, use and maintain a timber mat crossing (2014 TL-283 Pipeline Replacement Project-Area 2) along an unnamed tributary of Robinson Fork near Center Point in Doddridge County, West Virginia.

This Right of Entry is subject to the following terms and conditions:

1. No in stream work during the fish-spawning season (April 1-June 30).
2. Work should be completed as quickly as possible during low flows in designated work areas only.
3. Any streambed disturbance should be restricted to the immediate area. In stream use of equipment should be kept to a minimum.
4. All shore areas disturbed by this operation must be reshaped, seeded and mulched immediately upon completion of work. The prompt establishment of vegetative cover will reduce future damage from high water levels.
5. Green concrete must not be put in the stream (highly toxic to aquatic life).
6. Guidance should be obtained from NRCS (formerly SCS) and a registered engineer for the design and construction. Must allow for passage of at least ten-year year flood flow.
7. Best management practices should be followed; measures such as hay bales must be used to reduce downstream siltation.
8. Applicant is responsible for removing debris from in and around the installation periodically to prevent stream flow obstruction.

Dominion Transmission, Inc.
LS-14-VI/09-572
Page 2
April 16, 2014

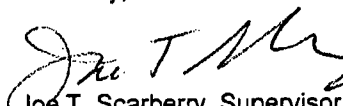

9. Durable head walls of logs, crossties, rock, or concrete shall be constructed at both the upstream and downstream ends of crossing to prevent erosion of fill material into the stream.
10. The State's issuance of this Right-of-Entry does not provide for the applicant to work outside the requested boundaries nor does the State assume any liability for the applicant's/landowner's construction activities. By accepting this Right-of-Entry, the applicant/landowner assumes liability for any/all damages caused by this activity to both upstream and downstream landowners.

Guidelines of Best Management Practices for Sediment and Erosion Control as outlined by the Section of Water Resources, Division of Environmental Protection must be followed. Copies of those guidelines are available from the Section of Water Resources, Telephone No. (304) 926-0440.

The issuance of this Right of Entry by the Division of Natural Resources does not preclude the necessity for you to obtain a permit from the U.S. Corps of Engineers District Office, Permit Section, or any other state or federal permits which may be required by law, nor does this Right of Entry negate the need to comply with the West Virginia Water Pollution Control Act and/or the State Environmental Quality Board's administrative regulations, applicant is also responsible for determining if the proposed activity is located within an identified flood plain and it is the applicant's responsibility for contacting the local governmental agency in charge of that program and obtaining a flood plain development permit for it. This Right of Entry does not grant any rights or privileges, or permission to enter upon or to cross the property of any other person, nor is permission granted to remove any material that lies upon the property of any other persons. Work should be completed in as brief a period as possible and within one year from the date of this letter. In the event you fail or refuse to comply with any of the terms or conditions herein, this Right of Entry will be canceled and considered null and void and the Division will reject further applications.

Your payment in the amount of \$100.00 is now due and payable to the Division of Natural Resources covering the first year's annual fee of this agreement. You must notify the Division in writing with this installation has been removed. Your agreement will be effective upon receipt of your payment in full.

Sincerely,

Joe T. Scarberry, Supervisor
Office of Land and Streams

RE: Dominion Transmission, Inc.
2014 TL-283 Pipeline Replacement Project – Area 2
Renewal of Threatened and Endangered Species Consultation
McElroy District, Tyler County and McClellan District, Doddridge County, West
Virginia

Dear Mr. Schmidt:

In a letter dated May 14, 2013, the U.S. Fish and Wildlife Service (USFWS) provided clearance for the Dominion Transmission, Inc. (DTI) 2013 TL-283 Pipeline Replacement Project – Job 1 in McElroy District, Tyler County, and McClellan District, Doddridge County, West Virginia (Enclosure 1). The 2013 TL-283 Pipeline Replacement Project – Job 1 was partially completed and is now named the 2014 TL-283 Pipeline Replacement Project – Area 2 (Project). DTI is requesting an updated Section 7 clearance for the Project which is now schedule to begin June 2, 2014 and end August 15, 2014.

The location of the proposed pipeline replacement will now begin about halfway through the previous project with starting coordinates of 39.436786, -80.63672 and have the same ending coordinates of 39.42370, -80.62465. ~~A majority of the workspace will be located within DTI's existing 50-foot wide maintained right-of-way (ROW).~~ In order to complete the proposed Project, DTI has added one additional pipeyard (Pipeyard 1) and one existing dirt/gravel access ~~to the project footprint in 2014. The total project footprint is 13.51 acres.~~ Enclosure 2 depicts

United States Department of the Interior

FISH AND WILDLIFE SERVICE

West Virginia Field Office
694 Beverly Pike
Elkins, West Virginia 26241

In response to your letter above, we have made a "no effect" determination that the project will not affect federally-listed endangered or threatened species. Therefore no biological assessment or further section 7 consultation under the Endangered Species Act is required with the Fish and Wildlife Service. Should project plans change, or if additional information on listed and proposed species becomes available, this determination may be reconsidered.

Definitive determinations of the presence of waters of the United States, including wetlands, in the project area and the need for permits, if any, are made by the U.S. Army Corps of Engineers. They may be contacted at: Huntington District, Regulatory Branch, 502 Eighth Street, Huntington, West Virginia 25701, telephone (304) 399-5710.

Mr. William Scarpinato
Dominion Resources Services, Inc.
5000 Dominion Boulevard
Glen Allen, VA 23060

Dear Mr. Scarpinato:

We have reviewed our files for information on rare, threatened and endangered (RTE) species and sensitive habitats for the area of the proposed TL-283 Pipeline Replacement Project – Area 2 in Doddridge County, WV.

We have no known records of any RTE species or sensitive habitats within the project area. The Wildlife Resources Section knows of no surveys that have been conducted in the area for rare species or rare species habitat. Consequently, this response is based on information currently available and should not be considered a comprehensive survey of the area under review.

The information provided above is the product of a database search and retrieval. This information does not satisfy other consultation or permitting requirements for disturbances to the natural resources of the state, and further consultation may be required. Additionally, any concurrence requirements for federally listed species must come from the US Fish and Wildlife Service.

Thank you for your inquiry, and should you have any questions please feel free to contact me at the above number, extension 2048. Enclosed please find an invoice.

Sincerely,

Barbara Sargent

Memorandum

Date:	May 13, 2014
To:	Mr. Jeffrey Prawdzik, Dominion Resource Services, Inc.
From:	Ms. Sharon Brown, <i>Environment & Archaeology, LLC</i>
Subject:	Nationwide Permit 12 Checklist Determination 2014 TL-283 Pipeline Replacement Project – Area 2

Based on the field surveys performed in February 2013, January 2014, and February 2014, as well as a map review and review of proposed Project impacts associated with the 2014 TL-283 Pipeline Replacement Project – Area 2, *Environment & Archaeology, LLC* has determined the following:

- No permanent wetland impacts will occur in conjunction with the Project.
- Approximately 0.36 acre of wetland will be timber matted which is not an activity regulated by the U.S. Army Corps of Engineers, per correspondence from the Huntington District.
- No permanent stream impacts will occur in conjunction with the Project.
- A total of 271 feet of stream channel will be timber matted to allow for site access. As stated above, the placement of timber mats is not an activity that is regulated by the U.S. Army Corps of Engineers.
- No Tier 2 or Tier 3 streams are crossed by the proposed Project.
- No Tier 1 streams have greater than 300 linear feet of impacts.
- No forested wetlands will be impacted by the Project.
- **Based on the above determination, the Project does not require U.S. Army Corps of Engineer clearance because there will be no impact to any wetlands or streams.**

DIVISION OF WATER AND WASTE MANAGEMENT
601 57th STREET SE
CHARLESTON, WV 25304-2345
GENERAL WATER POLLUTION CONTROL PERMIT**

Permit No. WV0116815

Issue Date: May 13, 2013

Effective Date: June 12, 2013

Expiration Date: May 13, 2018

Subject: Stormwater Associated
with Oil and Gas related Construction Activities

To Whom It May Concern:

This is to certify that any discharge of stormwater runoff from oil and gas field construction activities or operations such as exploration, production, processing or treatment operations or transmission facilities, disturbing one acre or greater of land area are agreeing to be regulated under the terms and conditions of this General Water Pollution Control Permit (General Permit), except for;

1. Activities that result in the disturbance of less than one acre of total land area, which are not part of a larger common plan of development.
2. Stormwater discharges associated with land disturbing activities that may reasonably be expected to be causing or contributing to a violation of a water quality standard as determined by the Director.
3. Activities regulated under the Department of Environmental Protection's Office of Oil and Gas (OOG).
4. Activities covered under the Division of Water and Waste's (DWWM) WV NPDES Stormwater Construction General Permit.

is hereby granted coverage under this General Water Pollution Control Permit to allow stormwater discharges into the surface waters of the State. This General Permit is subject to the following terms and conditions:

Subject: RE: 2014 TL-283 Pipeline Replacement data

Bill,

I spoke with Bo Wriston of the Doddridge County Commission about this request. He said the flood plain watch dog group is going through everything and pointed out to them that these documents are required (it is not mentioned anywhere in the application, and they are changing the form).

Note that the only aspect of Area 2 that is in the flood plain is a pipeyard/staging area on Roundbottom Road; however, the entire Area 2 was lumped together for the permitting and clearance packages. As such, I've attached everything for TL-283 Area 2 here that was obtained through the Environmental group. I'll spoke with Jeff Hull and he said Dominion owns the pipeyard and did not need to obtain any other permits for it such as the Highway Occupancy Permit, Driveway Permit, etc, so my attachments here are all that apply to Bo's request.

Let me know if you have any questions. I told Bo you would be forwarding these to him.

Thanks,

Jeff

Mr. Scarpinato,

In order to fully complete our work on the TL-283 Pipeline Replacement Project - Area 2 project for Dominion, designated as DCFPP #14-199, I need to get copies from you of the approval letters for all additional pertinent permits issued by other regulatory bodies such as DEP, USACE, WVDOH, etc. Our ordinance requires we have copies of those approved permits in our files.

Please provide the requested documentation at your earliest convenience.

Respectfully,
