**RE: Floodplain Development Permit Application
Dominion Transmission, Inc.
H-10619 Pipeline Replacement
Doddridge County, West Virginia**

Dear Mr. Sandora:

Dominion Transmission, Inc. (Dominion) is submitting the enclosed Doddridge County Floodplain Development Permit Application for the proposed H-10619 pipeline replacement project (Project) located in Doddridge County, West Virginia.

The Project includes the installation of approximately 100 linear feet (LF) of 3-inch diameter plastic natural gas pipeline within a 25-foot right-of-way. Flood Insurance Rate Map information (FIRM Panel #54017C0235C) obtained from the Federal Emergency Management Agency (FEMA) shows that the project area is located outside of FEMA Flood Zones subject to a one percent annual chance flood event (100-year flood or Base Flood).

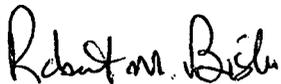

Construction activities will include the installation of the underground pipeline using open ditch techniques, waterbars for surface water control, trench plugs for open trench water control, and trench breakers for subsurface water control following pipeline installation. Following installation of the pipeline, the trench will be backfilled and compacted to approximate original contours and the area will be returned to original surface conditions with no permanent above ground structures. No access road construction is proposed. The proposed pipeline construction does not include any stream crossings.

A Project Location map, Flood Hazard map, and Floodplain Project map are also enclosed with the permit application. The Flood Hazard and Project Floodplain maps show the approximate location of the flood plain relative to the Project area.
