RIGHT OF ENTRY

Re: R-14-VI/09-1362

Albert Richards
2055 Central Station Road
West Union, WV 26456-

Dear Mr. Richards:

The Division of Natural Resources hereby grants to you for a period of one (1) year a Right of Entry for the purpose of removing silt from the creek for no more than three-hundred feet (300') and repairing the eroded creek banks for no more than three-hundred feet (300') along Wilhelm Run near West Union in Doddridge County, West Virginia.

This Right of Entry is subject to the following terms and conditions:

1. No in stream work during the fish-spawning season (April 1-June 30).
2. Work should be completed as quickly as possible during low flows in designated work areas only.
3. Any streambed disturbance should be restricted to the immediate area. In stream use of equipment should be kept to a minimum.
4. All shore areas disturbed by this operation must be reshaped, seeded and mulched immediately upon completion of work. The prompt establishment of vegetative cover will reduce future damage from high water levels.
5. Average width and depth of the new channel should be the same as existing channel.
6. All stream channel relocations should involve NRCS (formerly SCS) consultation for best construction standards and procedures. Must allow for passage of at least ten-year flow.

Albert Richards
R-14-VI/09-1362
Page 2
October 1, 2014

7. River gravel may not be used to stabilize banks.
8. An adequate upstream barrier should be maintained between the old and new channel prior to filling the new channel.
9. Water should not be allowed to enter the new channel until construction is completed and banks stabilized.
10. Best management practices should be followed; measures such as hay bales must be used to reduce downstream siltation.
11. The State's issuance of this Right-of-Entry does not provide for the applicant to work outside the requested boundaries nor does the State assume any liability for the applicant's/landowner's construction activities. By accepting this Right-of-Entry, the applicant/landowner assumes liability for any/all damages caused by this activity to both upstream and downstream landowners.

Guidelines of Best Management Practices for Sediment and Erosion Control as outlined by the Section of Water Resources, Division of Environmental Protection must be followed. Copies of those guidelines are available from the Section of Water Resources, Telephone No. (304) 926-0440.

The issuance of this Right of Entry by the Division of Natural Resources does not preclude the necessity for you to obtain a permit from the U.S. Corps of Engineers District Office, Permit Section, or any other state or federal permits which may be required by law, nor does this Right of Entry negate the need to comply with the West Virginia Water Pollution Control Act and/or the State Environmental Quality Board's administrative regulations, applicant is also responsible for determining if the proposed activity is located within an identified flood plain and it is the applicant's responsibility for contacting the local governmental agency in charge of that program and obtaining a flood plain development permit for it. This Right of Entry does not grant any rights or privileges, or permission to enter upon or to cross the property of any other person, nor is permission granted to remove any material that lies upon the property of any other persons. Work should be completed in as brief a period as possible and within one year from the date of this letter. In the event you fail or refuse to comply with any of the terms or conditions herein, this Right of Entry will be canceled and considered null and void and the Division will reject further applications.

There is no fee for this Right of Entry.

Sincerely,

Joe T. Scarberry, Supervisor

Mr. Albert Richards
2055 Central Station Road
West Union, West Virginia 26456

Dear Mr. Richards:

I refer to information received in this office on November 26, 2008, submitted on your behalf by the West Virginia Conservation Agency, and additional information received on August 7 and 15, 2014. You are requesting a Department of the Army (DA) authorization to remove accumulated material and stabilize the stream banks along Wilhelm Run, near West Union, Doddridge County, West Virginia.

On December 2, 2008, you were authorized perform work in waters of the United States under a Regional General Permit (RGP) which expired on September 12, 2012. You were unable to complete the work prior to the expiration of the RGP, which was not reissued. You are requesting a new authorization for the proposed work.

This project has been reviewed in accordance with Section 404 of the Clean Water Act (Section 404) and Section 10 of the Rivers and Harbors Act of 1899 (Section 10). The United States Army Corps of Engineers (Corps) responsibility under Section 10 is to regulate any work in, or affecting, navigable waters of the U.S. Under Section 404, the Corps regulates the discharge of dredged and/or fill material into jurisdictional waters of the U.S., including wetlands.

According to the information provided, you propose to remove accumulated material from the stream bed in order to restore flow. Section 404 authorization is **not** required for the removal of material provided it removed using bucket-type equipment (e.g. backhoe, excavator) in a manner not to push or re-deposit material into waters of the U.S. The original channel geometry shall be maintained to the extent practicable and removed material not used for bank stabilization must be placed in an upland area in a manner to prevent the re-entry into the waters of the U.S.

In addition, you propose to stabilize no more than 500 linear feet of stream bank using less than one cubic yard per running foot of suitable material capable of withstanding expected high flows. To the extent that the Corps has jurisdiction over the discharge of dredged and/or fill material associated with the proposed bank stabilization, it has been determined the project meets the criteria for Nationwide Permit # 13 (attached) under the February 21, 2012, Federal Register, Issuance of Nationwide Permits (77 FR 10184).

It is your responsibility to ensure all work conforms to all terms and conditions listed in the enclosed material for this authorization to be valid. Likewise, it is also your responsibility to ensure the authorized activity does not cause more than minimal changes to the hydraulic flow characteristics, increase flooding, or cause more than minimal degradation of water quality of any stream.

You should contact the West Virginia Department of Natural Resources - Office of Land and Streams at 304-558-3225 to determine if a Stream Activity Permit is required. Upon completion of the work, the attached certification must be signed and returned to this office. Please be aware this correspondence does not obviate the requirement to obtain state or local assent required by law for the activity. If you have any questions please contact Richard Hemann of the South/Transportation Branch at 304-399-5710.

Sincerely,

Sarah M. Workman

General Information Regarding the Removal of Material from Waters of the United States

**U. S. Army Corps of Engineers - Huntington District
502 8th Street – Attention RD-S
Huntington, West Virginia 25701**

September 26, 2013

Section 10 of the Rivers and Harbors Act of 1899 requires a Department of the Army (DA) permit be obtained for any work in, on, over or under a Section 10 (navigable) water of the U.S. A list of Section 10 streams located in, or adjacent to, the State of West Virginia is attached. If the work you propose is not on this list a Section 10 permit would not be required.

Section 404 of the Clean Water Act requires a DA permit be obtained prior to the discharge of dredged or fill material into waters of the United States (U.S.), including wetlands. A water of the U.S. is defined as waters which are, were, or may be used to transport foreign or interstate commerce, tributaries of those streams and adjacent wetlands. There are very few streams or wetlands that are not waters of the U.S. If you propose an activity that would result in the discharge (placement) of material in a potential water of the U.S., it is best to contact the U.S. Army Corps of Engineers (Corps) for information on obtaining a DA permit for the activity.

It is often necessary to remove accumulated material and/or debris to restore stream flow. If material is removed properly, as indicated below, the project would not result in the discharge of dredged or fill material into waters of the U.S.

A DA permit would not be required for the removal of material, provided:

1. Material is removed using bucket-type equipment, such as a backhoe or excavator, with equipment situated above the stream bank, where possible.
2. No material is removed that exceeds the dimensions of the original stream channel.
3. Removed material is immediately placed into dump truck or upland area for removal (the "scoop & go" method) to the proposed disposal site. No material may be sidecast, temporarily or permanently, into waters of the United States.
4. No fill is placed for temporary or permanent access. The temporary use of mats for equipment access is acceptable.
5. All removed materials are disposed at upland locations with no placement in, or return to, any waterway or wetland.
