West Union, WV 26456

**RE: *Doddridge County Floodplain Permit
Antero Midstream LLC
Tamela Compressor Site
Doddridge County, West Virginia
Thrasher Group Project # 101-030-2624***

Mr. Wristen:

On behalf of Antero Midstream LLC (Antero), The Thrasher Group, Inc. (Thrasher) is submitting to your office a project review request for a proposed compressor site project in the USGS West Union 7.5 minute quadrangle of Doddridge County, West Virginia. The proposed project will consist of earthwork for the proposed compressor site (cutting, grading, and compacting) and upgrading an associated existing access road, encompassing approximately 33.52 acres for the proposed project's construction limits of disturbance (LOD). The proposed Tamela Compressor Site will be located at approximate coordinates 39.32640°N and 80.84299°W. Please see the attached USGS topographical project location map.

Approximately 44 square feet of the proposed project area (edge of existing access road) falls within the 100-year floodplain. Please see attached WV Flood Tool Map and FEMA issued FIRM Map (Doddridge County Panels 105 of 325) with the project area overlaid.

The total cost of construction within the floodplain was calculated at approximately \$10,000.00; resulting in a permit fee of \$500.00 (New Industrial Structures or Additions and/or Substantial Improvement to Existing Industrial Structures, changes in Land Use and Land Altering Activities for Industrial purposes the total cost of which do not exceed \$100,000.00).

No above-ground structures are proposed to be constructed within the 100 year floodplain. No impacts to the 100-year flood elevations, floodway elevations, or floodway widths on Long Run are proposed due to the size and nature of the project located within the 100-year floodplain. Please see attached documentation, as well as PE signature and stamp below.

THRASHER

Mr. Wristen
Page 2 of 2
October 21, 2014

Additionally, all required federal and state permit applications have been submitted for the project and can be provided upon request.

If any further documentation is required for this project, or if any questions may arise please feel free to contact me at your convenience at (304) 326-6366 or ddrennen@thrashereng.com.

Sincerely,

THE THRASHER GROUP, INC.

E. CONFIRMATION FORM

THE APPLICANT ACKNOWLEDGES, AGREES, AND CONFIRMS THAT HE/IT WILL PAY WITHIN 30 DAYS OF RECEIPT OF INVOICE BY THE COUNTY FOR ALL EXPENSES RELATIVE TO THE PERMIT APPLICATION PROCESS GREATER THAN THE REQUIRED DEPOSIT FOR EXPENSES INCLUDING:

- (A) PERSONAL SERVICE OF PROCESS BY THE DODDRIDGE COUNTY SHERIFF AT THE RATES PERMITTED BY LAW FOR SUCH SERVICE.
- (B) SERVICE BY CERTIFIED MAIL RETURN RECEIPT REQUESTED.
- (C) PUBLICATION.

SIGNED _____

DATE _____

**SECTION 4: ADDITIONAL INFORMATION REQUIRED (To be completed by
Floodplain Administrator/Manager or his/her representative)**

The applicant must submit the documents checked below before the application can be processed.

- A plan showing the location of all existing structures, water bodies, adjacent roads, lot dimensions and proposed development.
- Development plans, drawn to scale, and specifications, including where applicable: details for anchoring structures, storage tanks, proposed elevation of lowest floor, (including basement or crawl space), types of water resistant materials used below the first floor, details of flood proffing of utilities located below the first floor and details of enclosures below the first floor. Also _____

- Subdivision or other development plans (If the subdivision or development exceeds 50 lots or 5 acres, whichever is the lesser, the applicant must provide 100-year flood elevations if they are not otherwise available).
- Plans showing the extent of watercourse relocation and/or landform alterations.
- Top of new fill elevation _____ Ft. NGVD (MSL).
For floodproofing structures applicant must attach certification from registered engineer or architect.
- Certification from a registered engineer that the proposed activity in a regulatory floodway will not result in any increase in the height of the 100-year flood. A copy of all data and calculations supporting this finding must also be submitted.
- Manufactured homes located in a floodplain area must have a West Virginia Contractor's License and a Manufactured Home Installation License as required by the Federal Emergency Management Agency (FEMA).

Other:

SECTION 5: PERMIT DETERMINATION (To be completed by Floodplain Administrator/Manager or his/her representative)

I have determined that the proposed activity (**type is or is not**) in conformance with provisions of the Floodplain Ordinance adopted by the County Commission of Doddridge County on May 21, 2013. The permit is issued subject to the conditions attached to and made part of this permit.

SIGNED _____ DATE _____

If the Floodplain Administrator/Manager found that the above was not in conformance with the provisions of the Doddridge County Floodplain Ordinance and/or denied that application, the applicant may complete an appealing process below.

APPEALS: Appealed to the County Commission of Doddridge County? Yes No
Hearing Date: _____
County Commission Decision - Approved Yes No

CONDITIONS: _____

SECTION 6: AS-BUILT ELEVATIONS (To be submitted by APPLICANT before Certificate of Compliance is issued).

The following information must be provided for project structures. This section must be completed by a registered professional engineer or a licensed land surveyor (or attach a certification to this application).

COMPLETE 1 OR 2 BELOW:

- 1 Actual (As-Built) Elevation of the top of the lowest floor (including basement or crawl space is _____ FT. NGVD (MSL)
- 2 Actual (As Built) elevation of floodproofing is _____ FT. NGVD (MSL)

Note: Any work performed prior to submittal of the above information is at risk of the applicant.

SECTION 7: COMPLIANCE ACTION (To be completed by the Floodplain Administrator/Manager or his/her representative).

The Floodplain Administrator/Manager or his/her representative will complete this section as applicable based on inspection of the project to ensure compliance with the Doddridge County Floodplain Ordinance.

Division of Natural Resources
RIGHT OF ENTRY

Re: R-14-VI/09-1535

Antero Midstream LLC
c/o The Thrasher Group Inc.
Attention: Don Drennen
600 White Oaks Blvd.
Bridgeport WV, 26330-

Dear Sir or Madam:

The Division of Natural Resources hereby grants to you for License and Right of Entry for the purpose of conducting activities associated with the construction, operation and reclamation of the Tamela Compressor Station along unnamed tributaries of Long Run near West Union in Doddridge County, West Virginia.

The proposed project will impact a total of approximately seven-hundred-three feet (703') at five (5) separate locations (see Exhibit A - B) of unnamed tributaries of Long Run. We recommend strict adherence to the approved mitigation plan for restoration and enhancement approved for this project by the U.S. Army Corp. of Engineers and the West Virginia Department of Environmental Protection.

The State's issuance of this Right-of-Entry does not provide for the applicant to work outside the requested boundaries nor does the State assume any liability for the applicant's construction activities. By accepting this Right-of-Entry, the applicant assumes liability for any/all damages caused by this activity to both upstream and downstream landowners.

Guidelines of Best Management Practices for Sediment and Erosion Control as outlined by the Section of Water Resources, Division of Environmental Protection must be followed. Copies of those guidelines are available from the Section of Water Resources, Telephone No. (304) 926-0440.

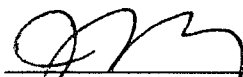

Antero Midstream LLC
R-14-VI/09-1535
Page 2
October 9, 2014

The issuance of this Right of Entry by the Division of Natural Resources does not preclude the necessity to obtain a permit from the Corps of Engineers or any other state or federal permits which may be required by law, nor does this Right of Entry negate the need to comply with the West Virginia Water Pollution Control Act and/or the State Environmental Quality Board's administrative regulations, applicant is also responsible for determining if the proposed activity is located within an identified flood plain and it is the applicant's responsibility for contacting the local governmental agency in charge of that program and obtaining a flood plain development permit for it. This Right of Entry does not grant any rights or privileges, or permission to enter upon or to cross the property of any other person, nor is permission granted to remove any material that lies upon the property of any other persons. Work should be completed in as brief a period as possible and within one year from the date of this letter. In the event you fail or refuse to comply with any of the terms or conditions herein, this Right of Entry will be canceled and considered null and void and the Corporation will reject further applications.

Your check is now due and payable in the amount of one thousand dollars (\$1,000.00) to the Division of Natural Resources covering the first year's annual fee of this agreement. The annual fee shall remain in effect until: the temporary structures have been removed; affected stream channels have been restored or reconstructed in accordance with their Stream Reconstruction Plan approved by the WVDEP; and all mitigation efforts required in the Mitigation/Compensation Agreement for this project have been completed. You must notify this office in writing when the above-mentioned conditions have been completed.

Please indicate 's approval of the Right of Entry by having an authorized representative of the Company sign both copies of this Letter Agreement and returning one (1) copy to this office. The other copy of the Letter Agreement may be retained for your files.

If you have any questions, please contact our office at (304) 558-3225.

Mr. Brett F. Fletcher
Antero Resources
1625 17th Street, Suite 300
Denver, CO 80202

Dear Mr. Fletcher:

We have reviewed our files for information on rare, threatened and endangered (RTE) species and sensitive habitats for the area of the proposed Tamela Compressor Site project in Doddridge County, WV (Thrasher Project 101-030-2624).

We have no known records of any RTE species or sensitive habitats within the project area. The Wildlife Resources Section knows of no surveys that have been conducted in the area for rare species or rare species habitat. Consequently, this response is based on information currently available and should not be considered a comprehensive survey of the area under review.

The information provided above is the product of a database search and retrieval. This information does not satisfy other consultation or permitting requirements for disturbances to the natural resources of the state, and further consultation may be required.

Thank you for your inquiry, and should you have any questions please feel free to contact me at the above number, extension 2048. Enclosed please find an invoice.

Sincerely,

Barbara Sargent

RE: Tamela Compressor Site Project
FR#: 15-6-DO

Dear Mr. Drennen:

We have reviewed the above mentioned project to determine its effects to cultural resources. As required by Section 106 of the National Historic Preservation Act of 1966, as amended, and its implementing regulations, 36 CFR 800: "Protection of Historic Properties," we submit our comments.

According to the submitted information, Antero Midstream, LLC proposes to construct a compressor station and associated access road on upland terrain located above Long Run in Doddridge County, WV. It is our understanding that the nearest National Register listed property is 4.2 miles to the northeast and that no buildings more than 50 years of age are located within the proposed project area or within its line of sight. A search of our records indicates that no previously documented archaeological resources are located within the proposed project area. In addition, available information indicates the proposed project is situated on steep terrain and/or was previously disturbed during construction of a dirt race track that was situated on ridge top. As a result, in our opinion no historic properties are present within the proposed project area. No further consultation is necessary. However, if intact archaeological materials are encountered while the compressor station is being constructed, please cease all activity in the area of discovery and contact this office immediately.

We appreciate the opportunity to be of service. *If you have questions regarding our comments or the Section 106 process, please contact Lora A Lamarre-DeMott, Senior Archaeologist, at (304) 558-0240.*

Sincerely,

A handwritten signature in black ink that reads "Susan M. Pierce". The signature is written in a cursive style with a large, prominent initial "S".

PRELIMINARY JURISDICTIONAL DETERMINATION
AND NATIONWIDE PERMIT NO. 39 VERIFICATION

Mr. Jeff Tarde
Antero Resources Corporation
1615 Wynkoop Street
Denver, CO 80202

Dear Mr. Tarde:

I refer to your Pre-Construction Notification (PCN) requesting a Department of the Army (DA) authorization to discharge dredged and/or fill material into waters of the United States (U.S.) in association with the proposed Smith Pipeline and Tamela Compressor Station Project. The proposed commercial development project will transport natural gas from the Tamela Compressor Station (39.327042°N, 80.842215°W) via the Smith Pipeline which will tie into the Nichols Pipeline (39.30114°N, 80.864855°W). The project is located near West Union, in Doddridge County, West Virginia. On-site waters flow into Long Run, an indirect tributary to the Ohio River, a traditional navigable water of the U.S. This project has been assigned the following file number: LRH-2015-00125-OHR-Hugle Run. Please reference this file number on all future correspondence related to this project.

The U.S. Army Corps of Engineers (Corps) authority to regulate waters of the U.S. is based on the definitions and limits of jurisdiction contained in 33 CFR 328 and 33 CFR 329. Section 404 of the Clean Water Act (Section 404) requires that a DA permit be obtained prior to discharging dredged or fill material into waters of the U.S., including wetlands. Section 10 of the Rivers and Harbors Act of 1899 (Section 10) requires that a DA permit be obtained for any work in, on, over or under a navigable water.

Preliminary Jurisdictional Determination (JD)

Based on a review of the above submitted information, this office has determined that four (4) emergent wetlands, totaling approximately 0.09 acre, and ninety-five (95) stream channels, totaling approximately 31,625 linear feet (lf) are located within the JD Boundary, as described in the enclosed PJD form. This office has determined that these streams may be jurisdictional waters of the United States in accordance with the Regulatory Guidance Letter for Jurisdictional Determinations (JDs) issued by the Corps on June 26, 2008 (Regulatory Guidance Letter No. 08-02). As indicated in the guidance, this PJD is non-binding and cannot be appealed (33 CFR 331.2) and only provides a written indication that waters of the United States, including wetlands, may be present on-site.

You have declined to exercise the option to obtain an approved JD in this instance and at this time. However, for the purposes of the determination of impacts, compensatory mitigation, and other resource protection measures for activities that require authorization from this office, the streams and wetland identified above will be evaluated as if they are waters of the U.S.

Enclosed please find two copies of the PJD form. If you agree with the findings of this PJD and understand your options regarding the same, please sign and date one copy of the PJD form and return it to this office within 30 days of receipt of this letter. You should submit the signed copy via email to Kyle.M.Moore@usace.army.mil or to the following address for:

United States Army Corps of Engineers
Huntington District
Attn: Mr. Kyle Moore (LRH-2015-00125-OHR)
502 Eighth Street
Huntington, WV 25701

Nationwide Permit No. 39

The proposed project, as described in the submitted information, has been reviewed in accordance with Section 404 and Section 10. Based on your description of the proposed work, and other information available to us, it has been determined that this project will not involve activities subject to the requirements of Section 10. However, this project will include the discharge of dredged or fill material into waters of the U.S. subject to the requirements of Section 404.

In the PCN received in this office, you have requested a DA authorization to permanently discharge dredged and/or fill material into 0.003 acre of one (1) emergent wetland and 582.5 lf (0.015 acre) of stream, in association with construction of the Tamela compressor station. Similarly, you have requested DA authorization to temporary discharge dredged and/or fill material into 46.5 lf (0.006 acre) of streams for the construction of the Smith pipeline. The discharge of dredged and/or fill material into waters of the U.S. are described in Table 1. All work shall be conducted in accordance with the final plans provided by Antero dated December 17, 2015.

Based on your description of the proposed work, it has been determined the proposed discharge of dredged and/or fill material into waters of the U.S. for the linear transportation project meets the criteria for Nationwide Permit (NWP) No. 39 under the February 21, 2012 Federal Register, Reissuance of NWPs (77 FR 10184) provided you comply with all terms and conditions of the enclosed material, the attached special conditions, and the 401 Water Quality Certification (WQC) issued for this NWP by the West Virginia Department of Environmental

Protection. A copy of this NWP can be found on our website at <http://www.lrh.usace.army.mil/Missions/Regulatory.aspx>.

In view of the above, your commercial development project is authorized subject to the terms and conditions of the enclosed material, including the attached special conditions. It is your responsibility to ensure that your work conforms to all of the environmental management conditions listed within the enclosed material.

This verification is valid until the expiration date of the NWPs, unless the NWP authorization is modified, suspended, or revoked. The verification will remain valid if the NWP authorization is reissued without modification or the activity complies with any subsequent modification of the NWP authorization. All of the existing NWPs are scheduled to be modified, reissued, or revoked on March 18, 2017. Prior to this date, it is not necessary to contact this office for re-verification of your project unless the plans for the proposed activity are modified. Furthermore, if you commence or under contract to commence this activity before March 18, 2017, you will have twelve (12) months from the date of the modification or revocation of the NWP to complete the activity under the present terms and conditions of this NWP.

A copy of this NWP verification letter must be supplied to your project engineer responsible for construction activities. A copy of the verification letter must be kept at the site during construction. Upon completion of the work, the attached certification must be signed and returned to this office. If you have any questions concerning the above, please contact Kyle Moore at (513) 825-4489 or by email at Kyle.M.Moore@usace.army.mil.

Sincerely,

Michael E. Hatten
Chief, Energy Resource Branch

Nationwide Permit 39 Verification Special Conditions
Antero Resources Corporation – Smith Pipeline and Tamela Compressor Station Project
LRH-2015-00125-OHR – Hugle Run
Page 1 of 2

1. Should new information regarding the scope and/or impacts of the project become available that was not submitted to this office during our review of the proposal, you shall submit written information concerning the proposed modifications(s) to this office for review and evaluation, as soon as practicable.
2. In the event any previously unknown historic or archaeological sites or human remains are uncovered while accomplishing the activity authorized by this nationwide permit authorization, the permittee must cease all work in waters of the United States immediately and contact local, state and county law enforcement offices (only contact law enforcement on findings of human remains), the Corps at (304) 399-5610 and the West Virginia State Historic Preservation Office at (304) 558-0220. The Corps will initiate the Federal, state and tribal coordination required to comply with the National Historic Preservation Act and applicable state and local laws and regulations. Federally recognized tribes are afforded a government-to-government status as sovereign nations and consultation is required under Executive Order 13175 and 36 CFR Part 800.
3. The Corps has determined the permittee's compensatory mitigation proposal, as discussed in the letter dated 30 November 2015 confirming the reservation of the stream credits at the Kincheloe Wetland and Stream Mitigation Bank, is acceptable to offset unavoidable loss of waters of the United States as a result of the linear transportation project. The permittee will ensure the purchase of 273.94 feet of stream mitigation credit from the Kincheloe Wetland and Stream Mitigation Bank in Harrison and Lewis Counties, West Virginia. Prior to impacts to waters of the United States, the permittee shall provide to the Corps a copy of the fully executed mitigation bank agreement with the Kincheloe Wetland and Stream Mitigation Bank confirming the complete purchase of stream credits.
4. Section 7 obligations under Endangered Species Act must be reconsidered if new information reveals impacts of the project that may affect federally listed species or critical habitat in a manner or to the extent not previously considered, the proposed project is subsequently modified to include activities which were not considered during Section 7 consultation with the United States Fish and Wildlife Service, or new species are listed or critical habitat designated that might be affected by the subject project.

Nationwide Permit 39 Verification Special Conditions
Antero Resources Corporation – Smith Pipeline and Tamela Compressor Station Project
LRH-2015-00125-OHR – Hogle Run
Page 2 of 2

5. The United States Fish and Wildlife Service (USFWS) letter dated March 3, 2015 and Smith Pipeline and Tamela Compressor Station Project, Indiana Bat Conservation Plan contains avoidance, minimization and conservation measures for the federally listed Indiana bat (*Myotis sodalis*) and northern long-eared bat (*Myotis septentrionalis*). Your authorization under this Corps permit is conditional upon your compliance with the conservation measures incorporated by reference in this permit. Failure to comply with the conservation measures identified by the USFWS would constitute non-compliance with your Corps permit. The USFWS is the appropriate authority to determine compliance with the conservation measures identified and with the Endangered Species Act.

PRELIMINARY JURISDICTIONAL DETERMINATION FORM

BACKGROUND INFORMATION

A. REPORT COMPLETION DATE FOR PRELIMINARY JURISDICTIONAL DETERMINATION (PJD): January 19, 2016

B. NAME AND ADDRESS OF PERSON REQUESTING PRELIMINARY JD:

Requestor: Mr. Jeff Tarde
Antero Resources Corporation
1615 Wynkoop Street
Denver, Colorado 80202

Agent: Mr. Don Drennen
The Thrasher Group, Inc.
600 White Oaks Boulevard
Bridgeport, West Virginia 26330

C. DISTRICT OFFICE, FILE NAME, AND NUMBER:

LRH-2015-00125-OHR-Hugle Run; Antero Resources Corporation – Smith Pipeline and Tamela Compressor Station Project

D. PROJECT LOCATION(S) AND BACKGROUND INFORMATION:

State: West Virginia
County: Doddridge
City: West Union
Coordinates of site: 39.327042° N, 80.842215° W
Name of nearest waterbody: Long Run

Identify (estimate) amount of waters in the review area:

Non-wetland waters: 31,625.2 linear feet (lf); refer to Table 1
Cowardin Class: Riverine
Stream Flow: Perennial, Intermittent, and Ephemeral
Wetlands: 0.0863 acre; refer to Table 1
Cowardin Class: Palustrine emergent wetland (PEM)

Name of any water bodies on the site that have been identified as Section 10 waters:
None

E. REVIEW PERFORMED FOR SITE EVALUATION (CHECK ALL THAT APPLY):

- Office (Desk) Determination. Date: December 23, 2015
 Field Determination. Date: March 25, 2015

1. The United States Army Corps of Engineers (Corps) believes that there may be jurisdictional waters of the United States on the subject site, and the permit applicant or

other affected party who requested this preliminary jurisdictional determination (JD) is hereby advised of his or her option to request and obtain an approved JD for that site. Nevertheless, the permit applicant or other person who requested this preliminary JD has declined to exercise the option to obtain an approved JD in this instance and at this time.

2. In any circumstance where a permit applicant obtains an individual permit, or a Nationwide General Permit (NWP) or other general permit verification requiring "pre-construction notification" (PCN), or requests verification for a non-reporting NWP or other general permit, and the permit applicant has not requested an approved JD for the activity, the permit applicant is hereby made aware of the following: (1) the permit applicant has elected to seek a permit authorization based on a preliminary JD, which does not make an official determination of jurisdictional waters; (2) that the applicant has the option to request an approved JD before accepting the terms and conditions of the permit authorization, and that basing a permit authorization on an approved JD could possibly result in less compensatory mitigation being required or different special conditions; (3) that the applicant has the right to request an individual permit rather than accepting the terms and conditions of the NWP or other general permit authorization; (4) that the applicant can accept a permit authorization and thereby agree to comply with all the terms and conditions of that permit, including whatever mitigation requirements the Corps has determined to be necessary; (5) that undertaking any activity in reliance upon the subject permit authorization without requesting an approved JD constitutes the applicant's acceptance of the use of the preliminary JD, but that either form of JD will be processed as soon as is practicable; (6) accepting a permit authorization (e.g., signing a proffered individual permit) or undertaking any activity in reliance on any form of Corps permit authorization based on a preliminary JD constitutes agreement that all wetlands and other water bodies on the site affected in any way by that activity are jurisdictional waters of the United States, and precludes any challenge to such jurisdiction in any administrative or judicial compliance or enforcement action, or in any administrative appeal or in any Federal court; and (7) whether the applicant elects to use either an approved JD or a preliminary JD, that JD will be processed as soon as is practicable. Further, an approved JD, a proffered individual permit (and all terms and conditions contained therein), or individual permit denial can be administratively appealed pursuant to 33 C.F.R. Part 331, and that in any administrative appeal, jurisdictional issues can be raised (see 33 C.F.R. 331.5(a)(2)). If, during that administrative appeal, it becomes necessary to make an official determination whether CWA jurisdiction exists over a site, or to provide an official delineation of jurisdictional waters on the site, the Corps will provide an approved JD to accomplish that result, as soon as is practicable.

This preliminary JD finds that there "*may be*" waters of the United States on the subject project site, and identifies all aquatic features on the site that could be affected by the proposed activity, based on the following information:

SUPPORTING DATA. Data reviewed for preliminary JD (check all that apply - checked items should be included in case file and, where checked and requested, appropriately reference sources below):

- Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant: Antero Resources Corporation submitted the following information: *Wetland Delineation and Stream Identification Report for the Smith Pipeline and Tamela Compressor Site*, dated January 20, 2015, received in this office on January 21, 2015. Additional information was received May 27, 2015 and November 30, 2015. Final information was received on December 21, 2015.
- Data sheets prepared/submitted by or on behalf of the applicant/consultant: Data sheets in original and revised report.
- Office concurs with data sheets/delineation report. For the streams and wetland in Table 1.
 - Office does not concur with data sheets/delineation report.
- Data sheets prepared by the Corps:
- Corps navigable waters' study:
- U.S. Geological Survey Hydrologic Atlas:
 - USGS NHD data. USACE ORM NHD dataset.
 - USGS 8 and 12 digit HUC maps.
- U.S. Geological Survey map(s). WV-West Union 24K Quad:
- USDA Natural Resources Conservation Service Soil Survey. Web Soil Survey, accessed: December, 2015

CELRH-RD-E

Permit Number: LRH-2015-00125-OHR- Hugle Run

Name of Permittee: Mr. Jeff Tarde
Antero Resources Corporation
1615 Wynkoop Street
Denver, CO 80202

Date of Issuance: January 19, 2016

Upon completion of the activity authorized by this permit and any mitigation required by the permit, sign this certification and return it to the following address:

Huntington District
U.S. Army Corps of Engineers
502 8th Street
Huntington, West Virginia 25701-2070
Attn: CELRH-RD-E

Please note that your permitted activity is subject to a compliance inspection by a United States Army Corps of Engineers representative. If you fail to comply with this permit you are subject to permit suspension, modification, or revocation.

I hereby certify that the work authorized by the above referenced permit has been completed in accordance with the terms and conditions of the said permit, and required mitigation was completed in accordance with the permit conditions.
