

# Floodplain Development Permit

## Doddridge County, WV Floodplain Management

This permit gives approval for the development/ project listed that impacts the FEMA-designated floodplain and/or floodway of Doddridge County, WV, pursuant to the rules and regulations established by all applicable Federal, State and local laws and ordinances, including the Doddridge County Floodplain Ordinance. This permit must be posted at the site of work as to be clearly visible, and must remain posted during entirety of development.

**Permit: #17-462**  
**WEU 51 Bridge "A"**

**Date Approved: May 8, 2017**

**Expires: May 8, 2018**

**Issued to: EQT Production Company**

**POC: Cory Chalmers**  
**304-848-0061**

**Company Address: 120 Professional Place, Bridgeport, WV 26330**

**Project Address: Bluestone Creek off WV CR 13**

**Firm:**

**Lat/Long: 39.253314, 80.755644**

**Purpose of development: WEU 51 Bridge "A"**

**Issued by: George C. Eidel, CFM, OEM Director/Doddridge County FPM (or designee)**

**Date: May 8, 2017**

For additional information regarding this permit, please contact  
Doddridge County Floodplain Manager at 304.873.2631, or via email at  
doddridgecountyfpm@gmail.com

118 East Court Street; West Union, WV 26456

## **Doddridge County Floodplain Permits**

(Week of April 17, 2017)

Please take notice that on the **12th day of April, 2017**, **CEC on behalf of EQT Production Company** filed an application for a Floodplain Permit **#17-462** to develop land located at or about **39.253314N, -80.755644E, Bluestone Creek off WV CR 13**. The Application is on file with the Clerk of the County Court and may be inspected or copied during regular business hours. Any interested persons who desire to comment shall present the same in writing by **May 8, 2017** (20 calendar days after the announcement at the regularly scheduled Doddridge County Commission Meeting) delivered to the Clerk of the County Court at 108 Court Street Ste. 1, West Union, WV 26456. **This project is WEU 51 Bridge A.**

Permit# 17-462  
Project Name: WEU 51 "A" Bridge  
Permittees Name: EQT/CEC

## ***Doddridge County, WV***

# **Floodplain Development Permit Application**

This document is to be used for projects that impact/potentially impact the FEMA--designated floodplain and/or floodway of Doddridge County, WV pursuant to the rules and regulations established by all applicable Federal, State and local laws and ordinances, including the Doddridge County Floodplain Ordinance.

### **SECTION 1: GENERAL PROVISIONS (APPLICANT TO READ AND SIGN)**

1. No work may start until a permit is issued.
2. The permit may be revoked if any false statements are made herein.
3. If revoked, all work must cease until permit is re-issued.
4. Development shall not be used or occupied until a Certificate of Compliance is issued.
5. The permit will expire if no work is commenced within six months of issuance.
6. Applicant is hereby informed that other permits may be required to fulfill local, state, and federal requirements.
7. Applicant hereby gives consent to the Floodplain Administrator/Manager or his/her representative to make inspections to verify compliance.
8. I THE APPLICANT CERTIFY THAT ALL STATEMENTS HEREIN AND IN ATTACHMENTS TO THIS APPLICATION ARE, TO THE BEST OF MY KNOWLEDGE, TRUE AND ACCURATE.

## Site Plan

**A Site Plan is an accurate and detailed map of the proposed development for this project.** It shows the size, shape, location and special features of the project property, and the size and location of any development planned to the property, especially as that development will impact the floodplain and/or floodway. Site plans show what currently exists on the project property, and any changes or improvements you are proposing to make. **A certified and licensed engineering firm should complete site plans.**

### **A SITE PLAN MUST CONTAIN THE FOLLOWING INFORMATION:**

1. Legal description of the parcel, north arrow and scale
2. All property lines and their dimensions
3. Names of adjacent roads, location of driveways
4. Location of sloughs, tributaries, streams, rivers, wetlands, ponds, and lakes, with setbacks indicated, and including FEMA floodplain data based on most updated FIRM.
5. Location, size, shape of all buildings, existing and proposed, with elevation of lowest floor indicated.
6. Location and dimensions of existing or proposed on-site sewage systems.
7. Location of all propane tanks, fuel tanks or other liquid storage tanks whether above ground or below ground level.
8. Location and dimensions of any proposed pipeline placement(s) into floodplain/floodway.
9. Location and dimensions of any roadway development into floodplain/floodway. *(Includes initial development access roads)*
10. Location and dimensions of any bridge and/or culvert development into floodplain/floodway.
11. Location and dimensions of any storage yard or facility into the floodplain/floodway.
12. Location of any existing utilities and/or proposed utility placement and/or displacement.
13. Location, dimensions and depth of any existing or proposed fill on site.
14. A survey showing the **existing ground elevations** of at least location on the building site. **ELEVATION NOTE:** All vertical datum will reference either NGVD 29 or NAVD 88. Assumed datum will not be acceptable unless the property is located in an area where vertical datum has not been published. For those areas where vertical datum has not been established, a site plan with contours, elevations using assumed datum, high water marks and existing water levels of sloughs, rivers, lakes or streams and proposed lowest floor elevation.

## Applicant

Please read print name, sign and date below:

- I certify that I am authorized to submit this application for the primary project developer.
- I certify that the information included in this application is to the best of my knowledge true and complete.
- I certify that all required Federal, State, and local permits required by law and/or ordinance for the above described development of this project have been properly attained, are current and valid, and must be presented with this application before a Doddridge County Floodplain Permit may be issued.
- I understand that if in the course of the development project additional permits become required that were not needed during the initial proposal, the primary developer must notify the Doddridge County Floodplain Manager within 48 hours of such need, and that a "Stop Work" order may be issued for all project work directly impacting the floodplain or floodway, until such time the required additional permits are acquired.
- I understand that once the floodplain permit is submitted, the application will be entered into official public record at the next regularly scheduled Doddridge County Commission meeting after the date of submittal.
- I understand that from the date of submittal of the fully completed permit application, the Doddridge County Floodplain Manager has ninety (90) days to make a determination to either grant or deny said permit application. During this approval period, the Doddridge County Floodplain Manager may, at his or her discretion, conduct a review and/or additional study of provided documentation by means of an independent engineering firm. All costs associated with said review and/or study must be reimbursed to the County before issuance of approved permit.
- I understand that during the approval period, the Doddridge County Floodplain Manager or designee may at his or her discretion conduct site visits and document conditions of proposed development pursuant to the permit application.
- I understand that once the Floodplain Permit is granted, the permit will be entered into official public record at the next scheduled Doddridge County Commission meeting after the date of issuance. Appeals to the permit may be made no later than twenty (20) days after said issuance. If a valid appeal is submitted, as determined by the Doddridge County Floodplain Manager, a "Stop Work" order will be issued for all project development directly involving the floodplain or floodway. A public hearing by the Doddridge County Appeals Board will be scheduled no less than ten (10) days after the next regularly scheduled Doddridge County Commission meeting.
- I understand that all decisions of the Doddridge County Appeals Board shall be final.
- **I understand issuance of a Floodplain Permit authorizes me to proceed with construction as proposed. A Certificate of Compliance is required upon substantial completion of the project.**
- In signing this application, the primary developer hereby grants the Doddridge County Floodplain Manager or designee the right to enter onto the above---described location to inspect the development work proposed, in progress, and/or completed.
- I understand that if I do not follow exactly the site---plan submitted and approved by this permit that a "Stop Work" order may be issued by the Wirt County Floodplain Manager and that I must stop all construction immediately until discrepancies of actual work vs. proposed work is resolved.

NO PERMIT REQUIRED

Mr. Cory Chalmers  
EQT Production Company  
120 Professional Place  
Bridgeport, West Virginia 26330

Dear Mr. Chalmers:

I refer to the information received in this office on April 27, 2017, regarding a project located off of Maxwell Ridge (CR 13) near the town of Blandville in Doddridge County, West Virginia. The proposed project coordinates are 39.253315, -80.755645. This project has been assigned file number LRH-2013-01017-OHR-Bluestone Creek. Please refer to this number in any future correspondence regarding this matter.

This project has been reviewed in accordance with Section 404 of the Clean Water Act (Section 404) and Section 10 of the Rivers and Harbors Act of 1899 (Section 10). Under Section 404, the United States Army Corps of Engineers (Corps) regulates the discharge of dredged and/or fill material into waters of the United States (U.S.), including wetlands. Under Section 10 our responsibility is to regulate any work in, or affecting, navigable waters of the U.S.

Based on a review of the information provided, the proposed project will involve the replacement of an existing ford crossing used to access the EQT natural gas activities in the area. The construction of the bridge will involve the installation of concrete block wing walls built upon a compact stone foundation. The bridge will span an unnamed tributary to Bluestone Creek and will be constructed above the ordinary high water mark. No dredged and/or fill material will be discharged below the ordinary high water mark of the stream.

We have determined the proposed project will not result in discharge of dredged and/or fill material into waters of the United States or involve work in, on, over or under a navigable water of the United States. Therefore, a Department of the Army permit is not required from this office for the proposed activity. However, if this determination changes and it becomes necessary to perform work in, adjacent to or under navigable waters, or to discharge dredged and/or fill material into waters or navigable waters of the U.S., including wetlands, DA authorization would be required.

We appreciate your concern for our nation's aquatic resources. If you have any questions concerning the above, please contact Rachel A. Klug (304) 399-5858, by mail at the above address or by email at [rachel.a.klug@usace.army.mil](mailto:rachel.a.klug@usace.army.mil).

Sincerely,

A handwritten signature in black ink, appearing to read "Teresa Spagna". The signature is fluid and cursive, with the first name "Teresa" and last name "Spagna" clearly distinguishable.

Teresa Spagna

Re: EQT WEUS1 and OXF157 Concrete Forded Stream Crossing Replacements

Dear Mr. Kees,

Attached are inspector signed off plans showing locations where EQT is planning on replacing concrete forded stream crossings on two separate EQT well roads. The EQT WEUS1 will have one forded crossing replaced with a bridge, and the EQT OXF157 will have three forded crossings replaced with bridges. I have also enclosed the bridge details, email chain with the WVDNR showing the approved modification, and our email chain discussing the details of the project.

If you have any questions, please do not hesitate to contact me at 304-848-0078.

Sincerely,

A handwritten signature in black ink, appearing to read 'Nick Burgardner', written over a horizontal line.

Nick,

Are the below crossings new additional crossings or modification to previously permitted crossings? If they are new crossings, I will need a new stream activity application per project. If they are modifications to the original permitted crossing, I can add the information to our file and send you an email confirming we received and approve of the changes. If you have any questions, please let me know.

Thank you,

Nick:  
Please see the below commentary for the request.

The existing concrete fords will remain in place in their current conditions; we are not proposing to make any modifications to the existing crossings.

On project WEU 51 the following will be completed for the proposed bridge:  
Crossing will consist of a concrete abutment (2'x1.5' concrete pedestal and 0.5' x 7' thicken slab) that will be doweled in to the existing concrete ford mat which will be outside of the existing stream banks, then bin block walls will be placed adjacent to the concrete abutments for aggregate retention, a 100' bridge will be placed on the abutments and aggregate will be used to complete the approach grade to the bridge deck. The final step will be placing some addition riprap for drainage control.

On project OXF 157 the following will be completed for each proposed bridge:  
Crossing B will consist of a concrete abutment (2'x2' concrete pedestal) that will be doweled in to the existing concrete ford mat which will be outside of the existing stream banks, then bin block walls will be placed adjacent to the concrete abutments for aggregate retention, a 60' bridge will be placed on the abutments and aggregate will be used to complete the approach grade to the bridge deck. The final step will be placing some addition riprap for drainage control.

Crossing C will consist of a concrete abutment (2'x2' concrete pedestal) that will be doweled in to the existing concrete ford mat which will be outside of the existing stream banks, then bin block walls will be placed adjacent to the concrete abutments for aggregate retention, a 50' bridge will be placed on the abutments and aggregate will be used to complete the approach grade to the bridge deck. The final step will be placing some addition riprap for drainage control.

Crossing D will consist of a concrete abutment (2'x2' concrete pedestal) that will be doweled in to the existing concrete ford mat which will be outside of the existing stream banks, then bin block walls will be placed adjacent to the concrete abutments for aggregate retention, a 50' bridge will be placed on the abutments and aggregate will be used to complete the approach grade to the bridge deck. The final step will be placing some addition riprap for drainage control.

Thanks,  
Joseph

Allen/Joseph,

See highlighted below... Will need this question answered before we can proceed.

Thanks,

Nick.

Nick,

Can you give me the permit numbers for these project changes? Also we will need to know the exact changes that are being proposed, so that we have it in writing.

Thank you,

Carrie,

Per our phone conversation last week, attached are the modifications that EQT would like to make on two existing EQT DNR Permits. I have attached two files, one for the WEU51 and one for the OXF157. If you need anything further, or any further explanation please let me know.

Thanks,

Okay. Just sent me the plans and in the cover letter mention getting your DNR OLS permit changed so we have something on record. Send a copy out to the county inspector too. Just so he's aware of the changes.

Kelly,

Both sites have active permits, I think they also have producing wells. LOD's will not change.

Nick.

**Subject:** RE: Bridge Upgrades on Well Roads

I just need the plans with the changes. If the LOD hasn't changed then a modification won't be necessary. Are both sites associated with wells with active permits?

**Subject:** Bridge Upgrades on Well Roads

Kelly/Laura,

EQT is wanting to upgrade some low water concrete stream crossings to conventional bridges on two of our well roads. I wanted to know what the office of oil and gas would need from us to stay in compliance. I have DNR OLS permits currently for the low water crossings, and I am in the process of getting modified DNR OLS permits for the new bridges. I have site plans and construction details outlining our plans for the bridges, what else would you anticipate needing from us for this project?

Thanks,

Nick Bumgardner

George:

The following checks amounts should be associated with the noted bridge applications:

WEU 51 bridge \$1935.00  
OXF 157 Bridge B \$1175.00  
OXF 157 Bridge C \$1080.00  
OXF 157 Bridge D \$1090.00

Let me know if you have any questions or need additional clarification.

Thanks,  
Joseph
