Site Plan

A Site Plan is an accurate and detailed map of the proposed development for this project. It shows the size, shape, location and special features of the project property, and the size and location of any development planned to the property, especially as that development will impact the floodplain and/or floodway. Site plans show what currently exists on the project property, and any changes or improvements you are proposing to make. **A certified and licensed engineering firm should complete site plans.**

A SITE PLAN MUST CONTAIN THE FOLLOWING INFORMATION:

1. Legal description of the parcel, north arrow and scale
2. All property lines and their dimensions
3. Names of adjacent roads, location of driveways
4. Location of sloughs, tributaries, streams, rivers, wetlands, ponds, and lakes, with setbacks indicated, and including FEMA floodplain data based on most updated FIRM.
5. Location, size, shape of all buildings, existing and proposed, with elevation of lowest floor indicated.
6. Location and dimensions of existing or proposed on-site sewage systems.
7. Location of all propane tanks, fuel tanks or other liquid storage tanks whether above ground or below ground level.
8. Location and dimensions of any proposed pipeline placement(s) into floodplain/floodway.
9. Location and dimensions of any roadway development into floodplain/floodway.
(Includes initial development access roads)
10. Location and dimensions of any bridge and/or culvert development into floodplain/floodway.
11. Location and dimensions of any storage yard or facility into the floodplain/floodway.
12. Location of any existing utilities and/or proposed utility placement and/or displacement.
13. Location, dimensions and depth of any existing or proposed fill on site.
14. A survey showing the **existing ground elevations** of at least location on the building site. **ELEVATION NOTE:** All vertical datum will reference either NGVD 29 or NAVD 88. Assumed datum will not be acceptable unless the property is located in an area where vertical datum has not been published. For those areas where vertical datum has not been established, a site plan with contours, elevations using assumed datum, high water marks and existing water levels of sloughs, rivers, lakes or streams and proposed lowest floor elevation.

Office of Land and Streams
RIGHT OF ENTRY

Kerry Sisler
Attention: Black Star Trading Company LLC
716 Armory Rd
Clarksburg, WV 26301

Re:LS-2025-VI-09-18149

To Whom It May Concern:

The West Virginia Division of Natural Resources (WVDNR) hereby authorizes for a term of 25 years, from the date hereof, a Right of Entry to install and maintain a (150'x20') bridge at one location (Kerry Sisler Bridge Installation) along Middle Island Creek, near West Union, Doddridge County, West Virginia.

The issuance of this Right of Entry by the WVDNR does not preclude the necessity to obtain permits from the U.S. Army Corps of Engineers (USACE), W.V. Department of Environmental Protection (WVDEP), or the W.V. Division of Homeland Security and Emergency Management (WVDHSEM). This Right of Entry does not negate the need to comply with the West Virginia Water Pollution Control Act and/or the State Environmental Quality Board's administrative regulations.

It is advised to contact the following agencies for additional guidelines and/or regulations:

1. The USACE [Huntington District (304-399-5210) or the Pittsburgh District (412-395-7155)] may require either an Individual Clean Water Act 404 permit or a Nationwide Permit.
<http://www.lrh.usace.army.mil/Missions/Regulatory.aspx>
2. The WVDNR Environmental Coordination Unit (304-637-0245) should be contacted for the Mussel survey requirements for streams with mussel populations as described in the West Virginia Mussel Survey Protocol
<http://www.wvdnr.gov/Mussels/West%20Virginia%20Mussel%20Survey%20Protocols%20APR2016.pdf>

3. The WVDEP (304-926-0499) may require the following permits:
 - a. A Clean Water Act Section 401 Water Quality Certification
<http://www.dep.wv.gov/WWE/Programs/Pages/401Certification.aspx>
 - b. Construction Stormwater Site Registration and Notice of Intent. Not needed if disturbance less than (1) acre.
http://dep.wv.gov/WWE/Programs/stormwater/Pages/sw_home.aspx
4. The Division of Water and Waste Management, (304-926-0495) should be contacted for the WVDEP Erosion and Sediment Control Best Management Practice Manual, Revised 2016, that it requires to be followed.
http://www.dep.wv.gov/WWE/Programs/stormwater/csw/Pages/ESC_BMP.aspx
5. The WVDHSEM (304-957-2571) may require a Floodplain Permit.
6. The U.S. Fish and Wildlife Service Field Office (304-636-6568) should be contacted for any activity in waterways listed in Appendix A of the 2017 USACE Nationwide Permits for threatened or endangered aquatic species identified by the U.S. Fish and Wildlife Service.
<http://www.lrp.usace.army.mil/Portals/72/docs/regulatory/2017%20Public%20Notices/West%20Virginia%20-%20NWP%20March%202017%20PN.pdf?ver=2017-03-22-095505-870>
7. The local Conservation District for the district where the work is to be performed should be contacted for technical support.

This Right of Entry does not allow in-stream work to be performed during the cold-water fish spawning season (September 15- March 31) and warm-water fish spawning season (April 1 - June 30). Spawning waivers may be obtained from the WVDNR Environmental Coordination Unit (304-637-0245).

This Right of Entry does not allow work outside the requested boundaries. The WVDNR does not assume any liability for your construction activities. By accepting this Right of Entry, you assume liability for any and all damage caused by this activity to both upstream and downstream landowners. This Right of Entry does not authorize any rights or privileges, or permission to enter upon, or to cross the property of any other person, nor does it authorize removal of any material that lies upon the property of another person.

All work authorized under this Right of Entry should be completed as soon as possible, but no longer than one year from the date hereof.

NO PERMIT REQUIRED

Kerry Sisler

West Union, WV 26465
Kerry.Sisler@gmail.com

Dear Kerry Sisler:

I refer to the information received in this office on June 5, 2025, concerning the proposed Bridge Replacement Project. You have requested the United States Army Corps of Engineers (Corps) review your proposal for possible Department of the Army (DA) permit requirements. The proposed activity would be located near West Union, in Doddridge County, West Virginia, located at approximately 38.161571°N, -81.892257 °W. Your request has been assigned the following file number: LRH-2025-00511-OHR– Middle Island Creek. Please reference this file number on all future correspondence related to the subject proposal.

The Corps' authority to regulate waters of the United States is based on the definitions and limits of jurisdiction contained in 33 CFR 328 and 33 CFR 329. Section 404 of the Clean Water Act (Section 404) requires a DA permit be obtained prior to discharging dredged and/or fill material into waters of the United States, including wetlands. Section 10 of the Rivers and Harbors Act of 1899 (Section 10) requires a DA permit be obtained in advance of any work in, on, over, or under a navigable water of the United States, including wetlands. Section 10 of the Rivers and Harbors Act of 1899 (Section 10) requires a DA permit be obtained for any work in, on, over, or under a navigable water.

You have proposed activities involving the replacement of an existing bridge with a prefabricated Bailey Bridge to provide reliable access to homes. You have indicated, the bridge would span over the Middle Island Creek, with abutments constructed at the top of the banks with no discharges of dredged and/or fill material occurring in the channel. The activities do not include a discharge of dredged and/or fill material below the ordinary high-water mark, nor does the proposal include work in, on, over, or under a navigable water of the United States. The proposed activities, as described in the information received in this office would not require authorization under Section 404, because the proposed activities would avoid regulated discharges into the aquatic resources. Additionally, based on the information provided, you have indicated the proposal would not include any work in, on, over, or under a traditional navigable water, subject to Section 10.

We have determined your proposal will neither result in a discharge of dredged and/or fill material into the aquatic resources, nor would the proposal involve work in, on, over, or under a navigable water of the United States. Therefore, no DA permit is required from this office for the proposed activity. However, if this determination changes and it becomes necessary to perform work in, adjacent to, or under navigable waters, or to discharge dredged and/or fill material into waters or navigable waters of the United States, including wetlands, authorization from the Corps would be required.

This letter does not excuse you from the obligation to obtain any other Federal, State, and/or local authorization, if required. You should not commence work until you receive the required authorizations. In addition, this letter does not grant any property rights or exclusive privileges or authorize any injury to the property or rights of others. If you contemplate any changes or additional activities from those described in the information received as of June 5, 2025, please submit them to this office for authorization review prior to construction.

We appreciate your concern for our nation's aquatic resources. If you have any questions concerning the above, please contact Wes.Barnett at (304) 399-6905, by mail at the above address, or by email at wes.barnett@usace.army.mil.

Sincerely,

Wes Barnett
